

Mohan Babu Doddapaneni

FULL STACK DEVELOPER

MA, USA | 774-351-6990 | mohanbabud25@gmail.com | [LinkedIn](#)

SUMMARY

- Full Stack Developer with **5 years of experience** delivering scalable, high-performance applications using **Java 8–17, Spring Boot microservices, Python (Flask/Django), and React/Angular UIs**, improving system reliability and user engagement.
- Skilled in **relational (PostgreSQL, MySQL) and NoSQL (MongoDB, DynamoDB, Redis) databases**, implementing indexing and partitioning strategies that reduced query response times by 30% and improved scalability.
- Designed and deployed **RESTful and GraphQL APIs**, reducing API latency by 50% and enabling seamless integrations.
- Hands-on experience with event-driven architecture using **Kafka and RabbitMQ**, enabling real-time data streaming and asynchronous communication across microservices.
- Experienced in Agile/Scrum development with strong knowledge of **CI/CD pipelines (Jenkins, GitHub Actions), GitHub Copilot, and version control (Git/GitHub, Bitbucket)**, improving team collaboration, code quality, and efficiency.
- Strong knowledge of **AWS (EC2, Lambda, API Gateway, S3, CloudFormation) with containerization (Docker) and orchestration (Kubernetes)**, enabling 99.9% uptime and seamless scalability across distributed microservices.
- Proficient in building responsive, user-friendly UIs with **React, Redux, TypeScript, and Material-UI**, improving cross-device compatibility and user engagement.
- Expertise in **Data Structures & Algorithms**, applying optimized techniques to build scalable, high-performance systems capable of handling millions of requests with minimal latency.

SKILLS

Front-End Technologies:	HTML5, CSS3, Bootstrap, SASS, Tailwind CSS, JavaScript, Typescript, ES6, React JS, Redux, React Hooks, React Native, Angular, Vue.js, Next.js, Material UI
Back-End Technologies:	Java, Python, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices, APIs (REST, SOAP, GraphQL, Swagger OpenAPI), ORM, Node JS, Express JS
IDEs:	Visual Studio Code, IntelliJ IDEA, Eclipse, Maven, Gradle, NetBeans, Postman
Messaging & Streaming:	Kafka, RabbitMQ
Databases:	SQL, PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
Security:	Spring Security, OAuth2, JWT
Testing tools:	JUnit, Mockito, React Testing Library, Jest, Cypress
Cloud & Devops:	AWS (EC2, S3, VPC, API Gateway, Lambda, CloudFormation, Route53, CloudWatch), Docker, Kubernetes, CI/CD Pipelines (Jenkins, GitHub Actions, Terraform), Firebase
Collaboration & Workflow:	Git, GitHub, Bitbucket, Jira, Agile/Scrum
Other Skills:	Adobe Experience Manager (AEM), Babel, Webpack, A/B Testing, Apache Tomcat, WebLogic, IBM WebSphere, Grafana, Elasticsearch
Certifications:	Microsoft Certified: Azure Fundamentals, Java Cloud Native (Level 1 & 2)
Operating System:	Windows, UNIX, LINUX, Mac OS

WORK EXPERIENCE

Full Stack Developer | Adobe Inc, MA

Sept 2024 – Present

- Architected and led the design of a cloud-native asset management and real-time collaboration platform within Adobe Creative Cloud, ensuring horizontal scalability, high availability, and seamless integration with third-party creative tools and Adobe Sensei AI services.
- Implemented a robust microservices architecture using Java and Spring Boot, enabling modular service development, faster CI/CD deployment cycles, and facilitating 50% faster delivery of new features across product suites such as Photoshop and Illustrator.
- Integrated edge and IoT-like creative devices (e.g., styluses, tablets, smart design peripherals) using secure APIs and event-driven architecture to capture real-time creative inputs, enhancing synchronous collaboration and creative asset versioning.

- Leveraged AI for dynamic layout suggestions in design projects using user history and asset metadata, improving design creation speed for novice users by 30%.
- Developed modern, responsive, and intuitive user interfaces using React (Redux, Hooks), Next.js, and Tailwind CSS, with a focus on adaptive rendering and multi-device support. Enhanced user engagement by 10% and reduced interface-related errors by 30%, based on telemetry from Adobe Analytics.
- Engineered end-to-end encryption and secure communication protocols (TLS/SSL, OAuth 2.0) to safeguard digital assets, user session data, and collaborative design work across distributed systems.
- Built a real-time alerting and notification system to update users about asset status changes, collaborative edits, and version conflicts, leveraging WebSockets and Kafka for low-latency delivery.
- Enhanced client-side data integrity and validation logic using React, including state management with Redux and event encapsulation, which led to a 25% reduction in frontend validation errors and improved cross-browser consistency.
- Optimized large-scale creative asset queries by implementing table partitioning and indexing strategies in PostgreSQL, improving query response times by 18% for high-volume user projects stored in Creative Cloud.

Associate Consultant, Full Stack Developer | Capgemini, India

Sept 2020 – Jul 2023

- Built a RESTful API using Spring Boot to serve data to front-end applications, implementing user authentication, data storage, and retrieval, resulting in a 40% reduction in development time compared to traditional approaches.
- Employed Java, Spring Boot, React, Hibernate ORM, and Git, ensuring an efficient technology foundation, with SQL (PostgreSQL/MySQL) integration for storing and managing application data, and incorporated Vue.js components in client-side dashboards for real-time task visualization.
- Developed RESTful APIs using Node.js for task and project creation, user management, timelines, and notifications.
- Utilized JIRA or similar tools for backlog management, sprint planning, and tracking the status of user stories tasks.
- Leveraged Spring Framework to develop a robust and modular backend architecture, streamlining data processing tasks and enhancing the system's responsiveness, resulting in a 50% reduction in API latency.
- Developed a Java-based inventory system, streamlining product catalog, orders, and reporting for businesses.
- Conducted comprehensive testing and debugging of applications using JUnit and debuggers to identify and resolve software defects and performance bottlenecks, reducing post-deployment issues by 30%.
- Developed and integrated RESTful APIs using Spring Boot, facilitating seamless communication between services.
- Implemented AWS Lambda functions to handle serverless computing tasks, reducing operational overhead and improving scalability for event-driven processes.
- Developed microservices for a financial application that handles account management, transactions, customer profiles, and fraud detection, ensuring scalability and security for handling sensitive data.
- Deployed applications on AWS using EC2 instances, ensuring high availability and scalability through Auto Scaling and Load Balancing, resulting in a 20% improvement in application uptime.
- Created a centralized portal for documenting and exploring the organization's APIs using Swagger, providing interactive documentation, code samples, and authentication details for each API endpoint.

Jr. Full Stack Developer | Wipro, India

Jul 2019 – Aug 2020

- Contributed to the development of KYC onboarding modules using Angular and Reactive Forms, enabling the accurate registration of 5,000+ customer profiles with dynamic validation rules and seamless data capture.
- Supported the development of RESTful backend services using Spring Boot, optimizing JSON responses and reducing AML alert review time by 30% through structured data delivery.
- Implemented basic Spring Security configurations for login, logout, and role-based access control across 4 KYC functional modules to strengthen compliance.
- Designed and styled key UI pages with Thymeleaf, Bootstrap, and custom components, helping analysts easily flag and escalate suspicious activities — which accelerated KYC review processes by 25%.
- Authored optimized SQL queries for PostgreSQL to support real-time storage and retrieval of analyst comments, risk scores, and AML audit trails, handling 10,000+ transaction records.
- Participated in Agile standups, sprint reviews, and backlog grooming, gaining hands-on experience in collaborative delivery cycles and continuous feedback integration.
- Assisted with manual functional testing, documented defects, and collaborated with QA teams to ensure smooth handovers between development and testing phases.
- Shadowed senior developers and gained practical knowledge of Git version control, Maven builds, and REST API integrations, laying a strong foundation for full stack proficiency.

EDUCATION

Master of Science in computer science - Clark University; Worcester, MA, USA

Bachelor of Technology in Electronics and Communication Engineering - JNTU Ananthapur, AP, India
